**BL-10909~BL-10913**

Our Ibiza designs kind of blur the line between light and art. While they will not light up a concert hall, they can provide just that touch of ambience for the path that leads to that hall. We build these lights from a variety of materials. The rods are always side emitting acrylic, but they do not have to be clear. By fitting the fixtures with color-changing LEDs, our Ibiza fixtures can provide a constantly changing show of fading or flickering colors. These fixtures are easily customized with circular curling rods...even square shapes. Just ask us. Long life LED boards provide all lamping.
