

Murano cascades are Our simple ideas turned into majestic sculpture. No two are alike because of the custom glass globes. We make each of them individually without use of a mold. They are free formed and blown relying on the blowers' strength and individual tastes. Water plays an important part in this process. The hot glass is dipped in water to produce fracture lines then reheated to melt things back together. The lines throw light in all directions and are really the most engaging part of the fixture. We add a mirror lens at top for effect. Just need a tall ceiling...

~Murano Series~

Mounting:Lightsmith fixtures mount to standard 4" octagon electrical boxes unless otherwise specified. All hardware and canopies supplied.

Listing and Warranty: Lightsmith fixtures are Underwriters Laboratories listed and carry a standard three year warranty against defects in materials and labor beginning at date of shipment.
