## SC-13400~SC-13411

Our LeMans fixtures are simple looking at first glance. But try to understand how they are put together and that simplicity kind of goes away. Their construction is actually significantly complex. Heavy bar stock framing on the sides provides the basis for attaching everything else to these units. Light comes from a lensed bulb mounted underneath a tall piece of plate glass. As that lamp shoots upward, it penetrates and spreads inside the glass plate producing very unique patterns within the 1/2" thick diffuser. LeMans is made with modular LEDs as well as screw-in medium base lamps.
