

# Lagos

## EX-13700~EX-13711

Our Lagos lanterns are blends of contemporary and traditional elements. Rounded spinnings are connected together by intricate cast knobs. Straight rods join bottoms to tops and are themselves joined to each other by thin rolled bands. And the whole lantern is joined to a back plate by a single massive curved rod. Very interesting construction to say the least. Acrylic cylinders handle the light diffusion. The straight body rods serve as a protective cage around the more delicate plastic interior. Available in three sizes. May be ordered in modular LED as well as medium base.
