

Trinidad

SC-8200~SC-8211

Our Trinidad fixtures are basic lighting designs. Their simplicity comes from use of material overlays and basic ring shapes to produce the overall effect. We blend fine hole perforated metal sheet with underlying acrylic to produce the Trinidad effect. The light refraction of the patterned holes has the effect of distorted depth control...a little like a carnival mirror. When we look at it, everything changes depending on viewing angle and room conditions. So it's kind of fun for us to build here in the Lightsmith studios, even though it doesn't take too long to manufacture. A nice simple fixture.
